TOXICOLOGY

Subject index

Volume 104 (1995)

Adenosine triphosphate levels; Paracetamol; Analgesic; NAPQI; Liver injury **104**, 91

Analgesic; Paracetamol; NAPQI; Liver injury; Adenosine triphosphate levels **104**, 91

Antioxidant systems; Metallothionein; Oxidative stress; Cadmium; Zinc; Lipopolysaccharide; α-Hederin **104**, 25

Apamin; Dendrotoxin; Potassium ion channel; Toxicity; Rat **104**, 47

Benzene; Pyridine; Lung; Liver; Microsomes; Metabolism **104**, 53

Bilirubin; Heme oxygenase; Oxidative stress; Cadmium chloride; α-Tocopherol; Rat liver **104**, 141

Biotransformation; Cytochrome P450; Human drug metabolism; Cytochrome P450 3A4; Xenobiotics **104**, 1

Brown Norway rat; Mercury vapour; Purkinje cell loss; GFAP-positive cell; Gliosis **104**, 83

Cadmium; Antioxidant systems; Metallothionein; Oxidative stress; Zinc; Lipopolysaccharide; α-Hederin **104**, 25

Cadmium; Metallothionein induction; Reuber H-35 rat hepatoma cell **104**, 99

Cadmium chloride; Heme oxygenase; Oxidative stress; Bilirubin; α-Tocopherol; Rat liver **104**, 141

Chemical-induced autoimmunity; Mast cell; Mercuric chloride; Cytokines; MHC class II **104**, 179

***Cis*-fatty acid anilides**; Toxic Oil Syndrome; *Cis*-fatty acids; Reactive oxygen metabolites; Intracellular calcium; Polymorphonuclear leukocytes **104**, 113

***Cis*-fatty acids**; Toxic Oil Syndrome; *Cis*-fatty acid anilides; Reactive oxygen metabolites; Intracellular calcium; Polymorphonuclear leukocytes **104**, 113

Contact hypersensitivity; Lymphocyte transformation; Formaldehyde; Tetramethylthiuram monosulfide; Epidermal cells **104**, 17

Cyanide; Methemoglobin; Methylene blue; Isosorbide dinitrate; Sodium nitrite **104**, 105

Cytochrome P450 3A4; Cytochrome P450; Human drug metabolism; Xenobiotics; Biotransformation **104**, 1

Cytochrome P450; Human drug metabolism; Cytochrome P450 3A4; Xenobiotics; Biotransformation **104**, 1

Cytokine gene expression; Nitrogen dioxide; Inflammation; Exposure model; IC-21 macrophage; LPS **104**, 159

Cytokines; Mast cell; Mercuric chloride; MHC class II; Chemical-induced autoimmunity **104**, 179

Cytotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; Renal cortical tubule cells; Metabolism; Nephrotoxicity **104**, 9

28-day study; Immunotoxicology; Rat; OECD 407; Screening battery **104**, 149

Dendrotoxin; Apamin; Potassium ion channel; Toxicity; Rat **104**, 47

1,2 Dichloroethane; Hepatotoxicity; Dolichol; Golgi apparatus; Glycosyl-transferases **104**, 63

DNA modifications; β-Naphthoflavone; P450 induction in rats; I-compounds; ^{32}P-postlabeling **104**, 165

Dolichol; 1,2 Dichloroethane; Hepatotoxicity; Golgi apparatus; Glycosyl-transferases **104**, 63

Enhancement; Isoflurane; Halothane; Inhibition; Interaction; Metabolism **104**, 123

Epidermal cells; Contact hypersensitivity; Lymphocyte transformation; Formaldehyde; Tetramethylthiuram monosulfide **104**, 17

0300-483X/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

Exposure model; Nitrogen dioxide; Inflammation; IC-21 macrophage; LPS; Cytokine gene expression **104**, 159

Formaldehyde; Contact hypersensitivity; Lymphocyte transformation; Tetramethylthiuram monosulfide; Epidermal cells **104**, 17

Gangliosides; Lysophospholipids; Mammary gland; Melittin; Phospholipids; Phosphorylation; Protein kinase C **104**, 73

GFAP-positive cell; Mercury vapour; Purkinje cell loss; Gliosis; Brown Norway rat **104**, 83

Gliosis; Mercury vapour; Purkinje cell loss; GFAP-positive cell; Brown Norway rat **104**, 83

Glycosyl-transferases; 1,2 Dichloroethane; Hepatotoxicity; Dolichol; Golgi apparatus **104**, 63

Golgi apparatus; 1,2 Dichloroethane; Hepatotoxicity; Dolichol; Glycosyl-transferases **104**, 63

Halothane; Isoflurane; Enhancement; Inhibition; Interaction; Metabolism **104**, 123

α-Hederin; Antioxidant systems; Metallothionein; Oxidative stress; Cadmium; Zinc; Lipopolysaccharide **104**, 25

Heme oxygenase; Oxidative stress; Cadmium chloride; Bilirubin; α-Tocopherol; Rat liver **104**, 141

Hepatotoxicity; 1,2 Dichloroethane; Dolichol; Golgi apparatus; Glycosyl-transferases **104**, 63

HSP 70; Precision-cut liver slices; HSP 90 **104**, 35

HSP 90; Precision-cut liver slices; HSP 70 **104**, 35

Human drug metabolism; Cytochrome P450; Cytochrome P450 3A4; Xenobiotics; Biotransformation **104**, 1

I-compounds; β-Naphthoflavone; P450 induction in rats; DNA modifications; ^{32}P-postlabeling **104**, 165

IC-21 macrophage; Nitrogen dioxide; Inflammation; Exposure model; LPS; Cytokine gene expression **104**, 159

Immunotoxicology; Rat; 28-day study; OECD 407; Screening battery **104**, 149

Inflammation; Nitrogen dioxide; Exposure model; IC-21 macrophage; LPS; Cytokine gene expression **104**, 159

Inhibition; Isoflurane; Halothane; Enhancement; Interaction; Metabolism **104**, 123

Interaction; Isoflurane; Halothane; Enhancement; Inhibition; Metabolism **104**, 123

Intracellular calcium; Toxic Oil Syndrome; *Cis*-fatty acids; *Cis*-fatty acid anilides; Reactive oxygen metabolites; Polymorphonuclear leukocytes **104**, 113

Isoflurane; Halothane; Enhancement; Inhibition; Interaction; Metabolism **104**, 123

Isosorbide dinitrate; Methemoglobin; Methylene blue; Cyanide; Sodium nitrite **104**, 105

Lipopolysaccharide; Antioxidant systems; Metallothionein; Oxidative stress; Cadmium; Zinc; α-Hederin **104**, 25

Liver; Benzene; Pyridine; Lung; Microsomes; Metabolism **104**, 53

Liver injury; Paracetamol; Analgesic; NAPQI; Adenosine triphosphate levels **104**, 91

LPS; Nitrogen dioxide; Inflammation; Exposure model; IC-21 macrophage; Cytokine gene expression **104**, 159

Lung; Benzene; Pyridine; Liver; Microsomes; Metabolism**104**, 53

Lymphocyte transformation; Contact hypersensitivity; Formaldehyde; Tetramethylthiuram monosulfide; Epidermal cells **104**, 17

Lysophospholipids; Gangliosides; Mammary gland; Melittin; Phospholipids; Phosphorylation; Protein kinase C **104**, 73

Mammary gland; Gangliosides; Lysophospholipids; Melittin; Phospholipids; Phosphorylation; Protein kinase C **104**, 73

Mast cell; Mercuric chloride; Cytokines; MHC class II; Chemical-induced autoimmunity **104**, 179

Melittin; Gangliosides; Lysophospholipids; Mammary gland; Phospholipids; Phosphorylation; Protein kinase C **104**, 73

Mercuric chloride; Mast cell; Cytokines; MHC class II; Chemical-induced autoimmunity **104**, 179

Mercury vapour; Purkinje cell loss; GFAP-positive cell; Gliosis; Brown Norway rat **104**, 83

Metabolism; *N*-(3,5-Dichlorophenyl)succinimide; Renal cortical tubule cells; Cytotoxicity; Nephrotoxicity **104**, 9

Metabolism; Benzene; Pyridine; Lung; Liver; Microsomes **104**, 53

Metabolism; Isoflurane; Halothane; Enhancement; Inhibition; Interaction **104**, 123

Metallothionein; Antioxidant systems; Oxidative stress; Cadmium; Zinc; Lipopolysaccharide; α-Hederin **104**, 25

Metallothionein induction; Reuber H-35 rat hepatoma cell; Cadmium **104**, 99

Methemoglobin; Methylene blue; Cyanide; Isosorbide dinitrate; Sodium nitrite **104**, 105

Methylene blue; Methemoglobin; Cyanide; Isosorbide dinitrate; Sodium nitrite **104**, 105

MHC class II; Mast cell; Mercuric chloride; Cytokines; Chemical-induced autoimmunity **104**, 179

Microsomes; Benzene; Pyridine; Lung; Liver; Metabolism **104**, 53

***N*-(3,5-Dichlorophenyl)succinimide**; Renal cortical tubule cells; Metabolism; Cytotoxicity; Nephrotoxicity **104**, 9

β-Naphthoflavone; P450 induction in rats; DNA modifications; I-compounds; ^{32}P-postlabeling **104**, 165

NAPQI; Paracetamol; Analgesic; Liver injury; Adenosine triphosphate levels **104**, 91

Nephrotoxicity; *N*-(3,5-Dichlorophenyl)succinimide; Renal cortical tubule cells; Metabolism; Cytotoxicity **104**, 9

Nitrogen dioxide; Inflammation; Exposure model; IC-21 macrophage; LPS; Cytokine gene expression **104**, 159

OECD 407; Immunotoxicology; Rat; 28-day study; Screening battery **104**, 149

Oxidative stress; Antioxidant systems; Metallothionein; Cadmium; Zinc; Lipopolysaccharide; α-Hederin **104**, 25

Oxidative stress; Heme oxygenase; Cadmium chloride; Bilirubin; α-Tocopherol; Rat liver **104**, 141

^{32}P-postlabeling; β-Naphthoflavone; P450 induction in rats; DNA modifications; I-compounds **104**, 165

P450 induction in rats; β-Naphthoflavone; DNA modifications; I-compounds; ^{32}P-postlabeling **104**, 165

Paracetamol; Analgesic; NAPQI; Liver injury; Adenosine triphosphate levels **104**, 91

Phospholipids; Gangliosides; Lysophospholipids; Mammary gland; Melittin; Phosphorylation; Protein kinase C **104**, 73

Phosphorylation; Gangliosides; Lysophospholipids; Mammary gland; Melittin; Phospholipids; Protein kinase C **104**, 73

Polymorphonuclear leukocytes; Toxic Oil Syndrome; *Cis*-fatty acids; *Cis*-fatty acid anilides; Reactive oxygen metabolites; Intracellular calcium **104**, 113

Potassium ion channel; Apamin; Dendrotoxin; Toxicity; Rat **104**, 47

Precision-cut liver slices; HSP 70; HSP 90 **104**, 35

Protein kinase C; Gangliosides; Lysophospholipids; Mammary gland; Melittin; Phospholipids; Phosphorylation **104**, 73

Purkinje cell loss; Mercury vapour; GFAP-positive cell; Gliosis; Brown Norway rat **104**, 83

Pyridine; Benzene; Lung; Liver; Microsomes; Metabolism **104**, 53

Rat; Apamin; Dendrotoxin; Potassium ion channel; Toxicity **104**, 47

Rat; Immunotoxicology; 28-day study; OECD 407; Screening battery **104**, 149

Rat liver; Heme oxygenase; Oxidative stress; Cadmium chloride; Bilirubin; α-Tocopherol **104**, 141

Reactive oxygen metabolites; Toxic Oil Syndrome; *Cis*-fatty acids; *Cis*-fatty acid anilides; Intracellular calcium; Polymorphonuclear leukocytes **104**, 113

Renal cortical tubule cells; *N*-(3,5-Dichlorophenyl)succinimide; Metabolism; Cytotoxicity; Nephrotoxicity **104**, 9

Reuber H-35 rat hepatoma cell; Metallothionein induction; Cadmium **104**, 99

Screening battery; Immunotoxicology; Rat; 28-day study; OECD 407 **104**, 149

Sodium nitrite; Methemoglobin; Methylene blue; Cyanide; Isosorbide dinitrate **104**, 105

Tetramethylthiuram monosulfide; Contact hypersensitivity; Lymphocyte transformation; Formaldehyde; Epidermal cells **104**, 17

α-Tocopherol; Heme oxygenase; Oxidative stress; Cadmium chloride; Bilirubin; Rat liver **104**, 141

Toxic Oil Syndrome; *Cis*-fatty acids; *Cis*-fatty acid anilides; Reactive oxygen metabolites; Intracellular calcium; Polymorphonuclear leukocytes **104**, 113

Toxicity; Apamin; Dendrotoxin; Potassium ion channel; Rat **104**, 47

Xenobiotics; Cytochrome P450; Human drug metabolism; Cytochrome P450 3A4; Biotransformation **104**, 1

Zinc; Antioxidant systems; Metallothionein; Oxidative stress; Cadmium; Lipopolysaccharide; α-Hederin **104**, 25
